### **DETAILED ACTION**

1. Receipt of the amendment and petition filed on May 10, 2005, is acknowledged. The amendment to the first page of the specification establishes a priority chain back to February 16, 1994, the filing date of application 08/197,154.
2. The terminal disclaimer filed on May 13, 2005, disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of patent 5,591,317 has been reviewed and is accepted. The terminal disclaimer has been recorded.
3. The terminal disclaimer is effective to overcome the double patenting rejection of record. Accordingly, this rejection is withdrawn.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Pitts, Jr. patent number 5,591,317.
6. The method taught by Pitts in the '317 patent anticipates the method of instant claims 1-3. The '317 patent teaches the same apparatus that is used in the instant method; and it teaches using the apparatus with the same conditions and parameters in the same environment encompassed by the scope of instant claim 1. Claim 1 requires reducing the formation of biofilm
